## IPM+ Policy & Compliance

---

### Executive Overview

IPM+ Policy & Compliance empowers enterprises with **900+ pre-built policies**, real-time audits, and automated enforcement. It ensures robust governance across BFSI, PSU, education, and enterprise verticals, with strong Windows support and partial Linux/Mac coverage.

---

### Key Features

- **Comprehensive Policies**  
900+ pre-built policies, including CIS compliance.
  - **Custom Policy Scripting**  
Tailored creation of policies for unique organizational needs.
  - **Partial DLP Features**  
Device control, App & URL blocking, Screen capture blocking, User login lock/unlock.
  - **Real-Time Audits**  
Continuous monitoring and auditing of compliance.
  - **Remediation Framework**  
Structured tools for addressing and correcting deviations.
  - **Automated Enforcement**  
Self-correcting compliance deviations, reducing manual overhead.
  - **Customizable Dashboards**  
Flexible audit and compliance dashboards for clear visibility.
  - **Cross-Platform Support**  
Full Windows support, partial Linux and Mac coverage.
- 

### Benefits

- **Enhanced Security** – Prevents unauthorized access and data leakage.
- **Operational Efficiency** – Automated enforcement reduces manual effort.
- **Regulatory Alignment** – CIS-ready policies ensure compliance.

- **Board-Level Reporting** – Dashboards provide actionable insights.
  - **Enterprise Scalability** – Designed for BFSI, PSU, education, and enterprise deployments.
